

7575150-VF
Waterboy 133L Vortex Submersible
Pump with Vertical Float

Features and Safety

This submersible vortex water pump is a compact portable pump for use with dirty water applications. This 133L Vortex pump handles soft solids up to 15mm in size. Fitted with a height adjustable vertical float switch, and an anti-clog semi-open impeller. With a 10m cable, designed to withstand weather, UV, and oil and a heavy duty cast iron body, the Waterboy vortex is ideal for use in the drainage of dirty water.

Inside the vertical pump float switch, there's a 360°C earthing plate. This safety feature ensures that, even if water were to enter, there would be no risk of electric shock or harm to the user, making it completely safe to operate.*

***Ensure you have thoroughly read the entire manual to understand the correct pump installation procedures and operating conditions.**

Height Adjustable Vertical Float Switch

The submersible vortex water pump float switch can be adjusted two ways:

Top Notch

1. Locate the notch at the top-end of the float switch.
2. Slide it up or down to your desired triggering height.
3. It will automatically lock into place once adjusted.
4. If the notch comes off the float switch you can easily attach it back on.

Bottom Notch

1. Locate the notch at the bottom of the float switch.
2. Use a screw driver to loosen the screw.
3. Once loosened, you can move the notch up or down to your desired triggering height.
4. Once positioned, tighten the screw back on.
